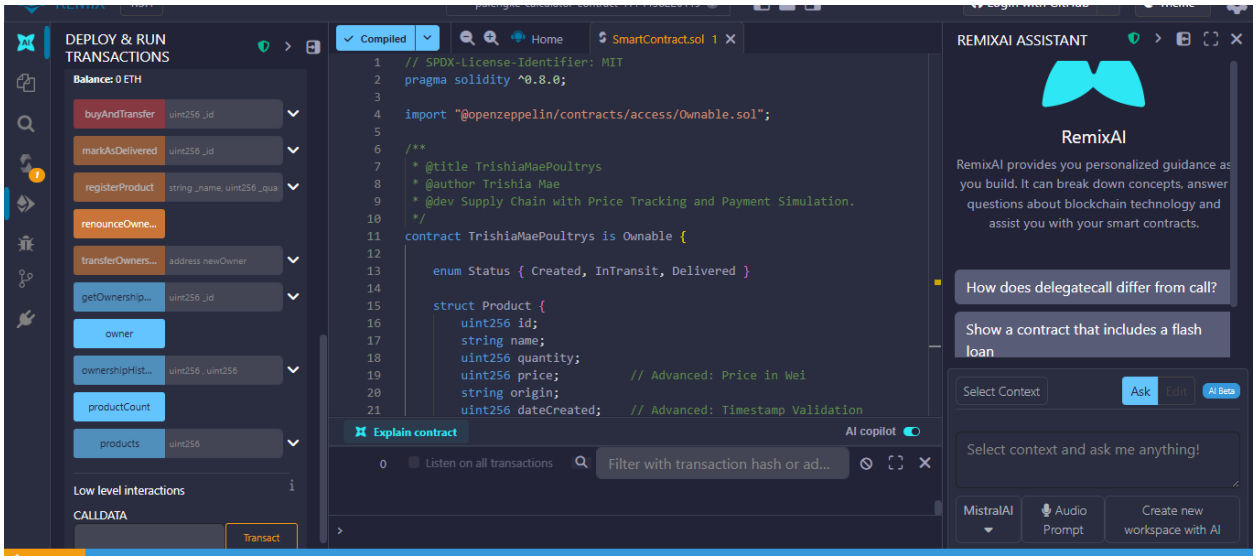
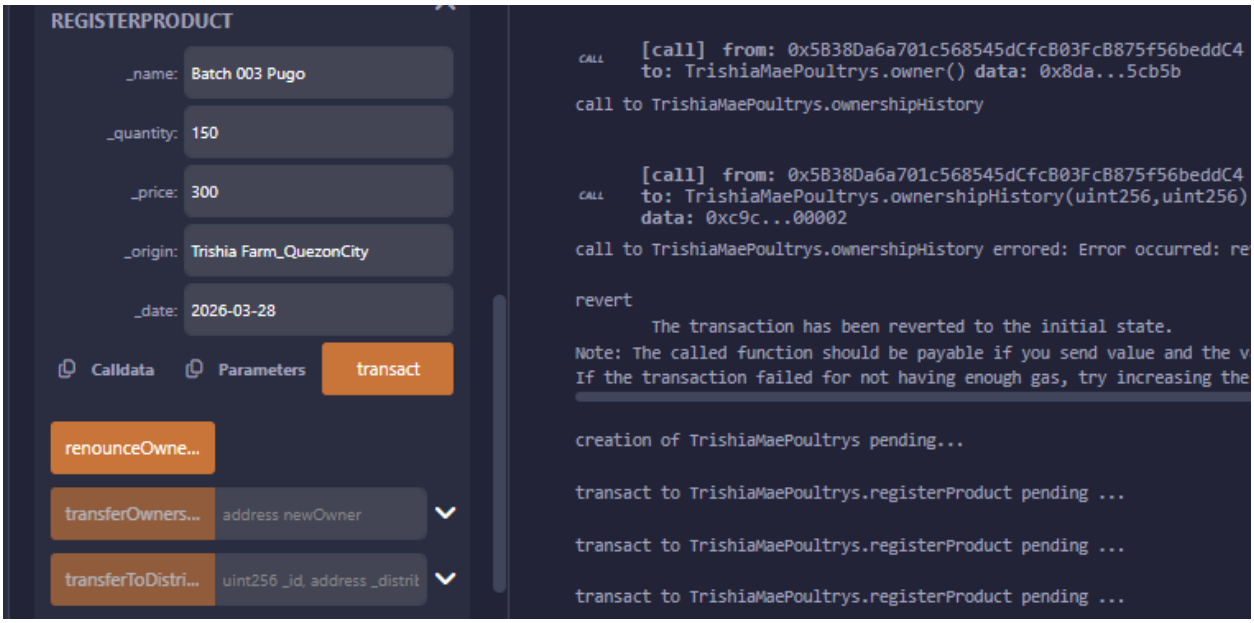
Trishia Mae L. Mañabat

Deployed Contract:



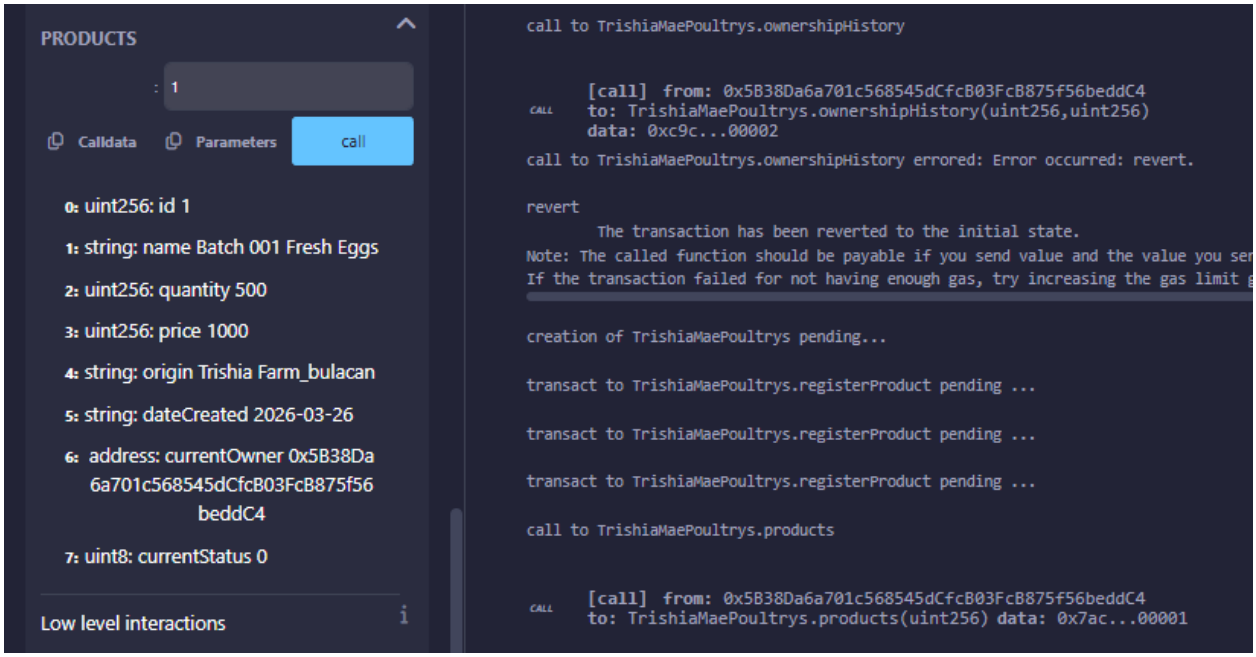
1. Product Registration

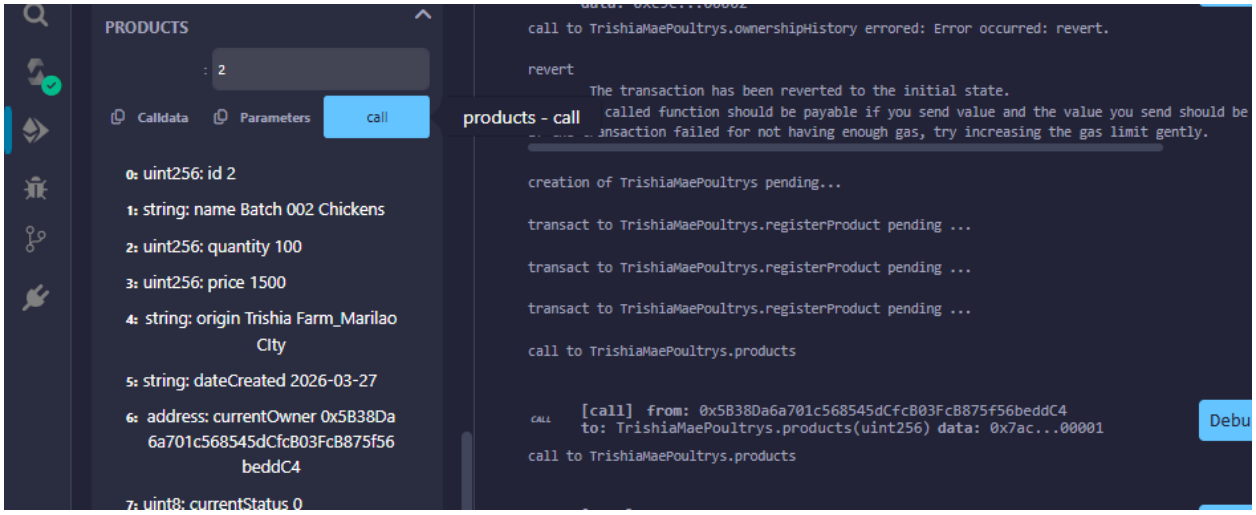
Prove that only the Farmer (Authorized Role) can create a batch with a unique ID, Name, Quantity, Origin, Price, and Date.

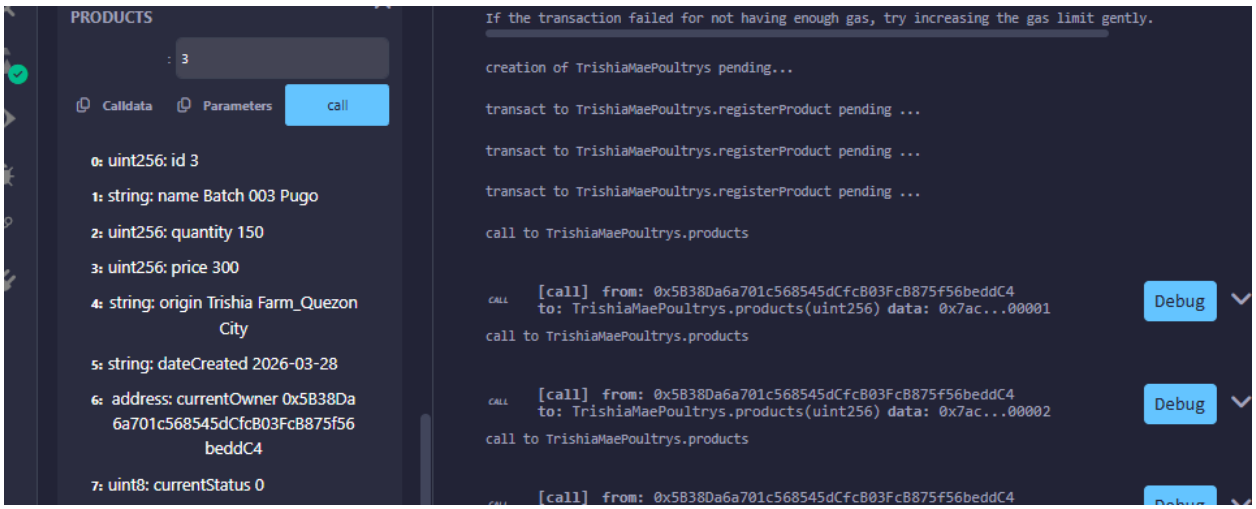


2. Ownership Tracking

Verify that the system accurately records who currently holds the product.

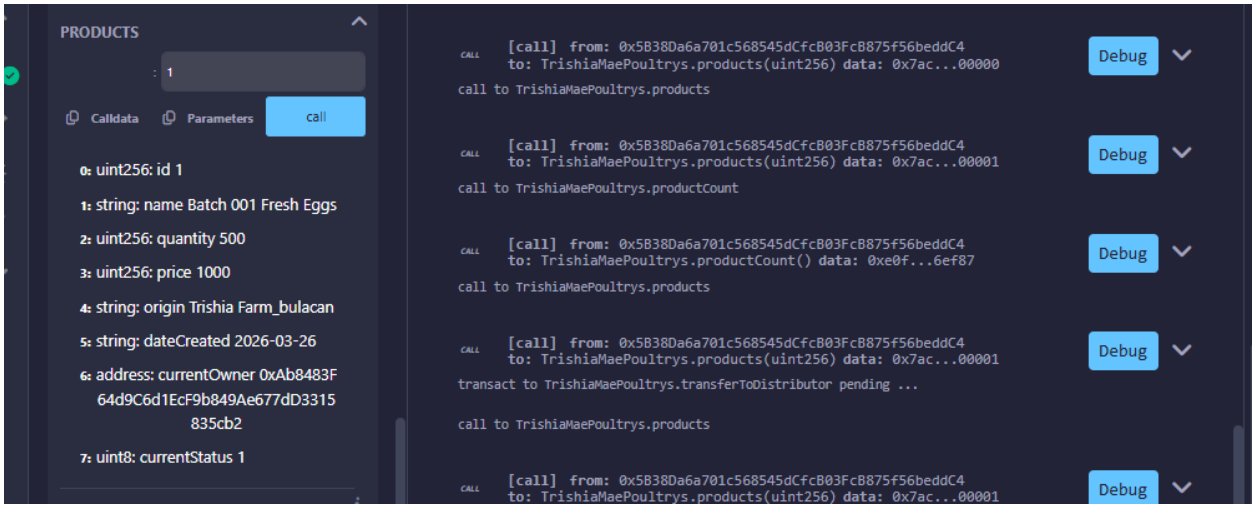


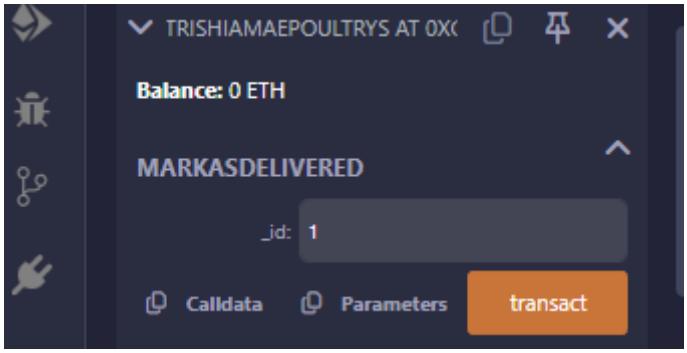


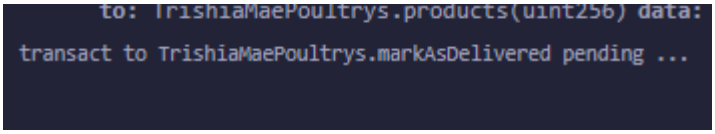


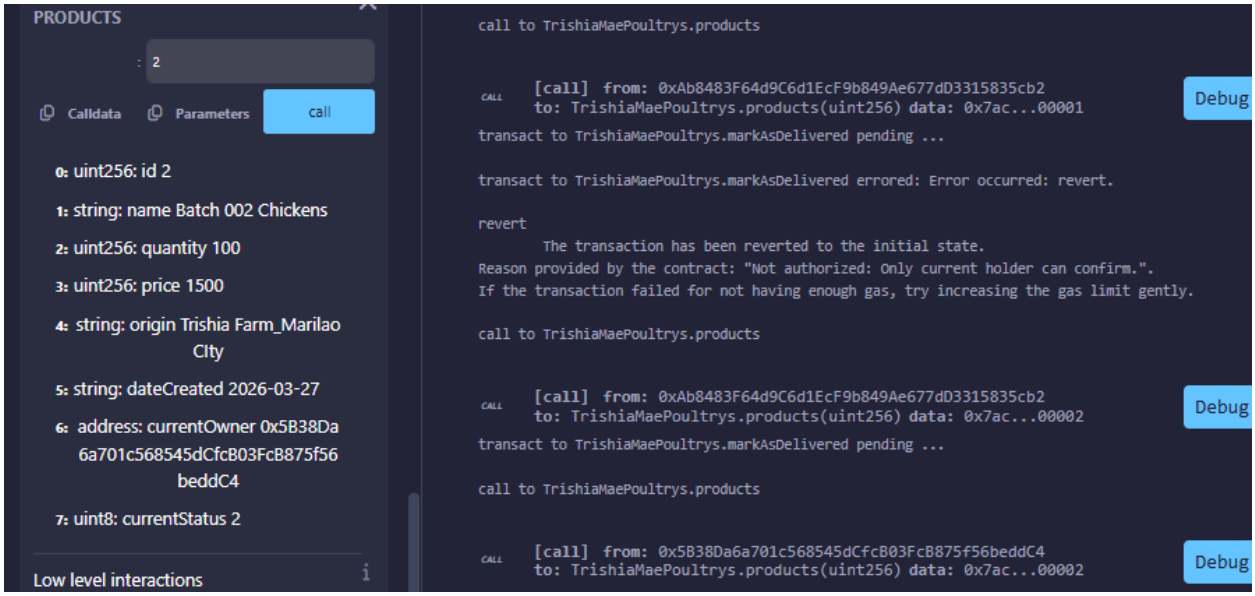
3. Status Updates

Demonstrate the lifecycle stages: 0 (Created), 1 (In Transit), and 2 (Delivered).



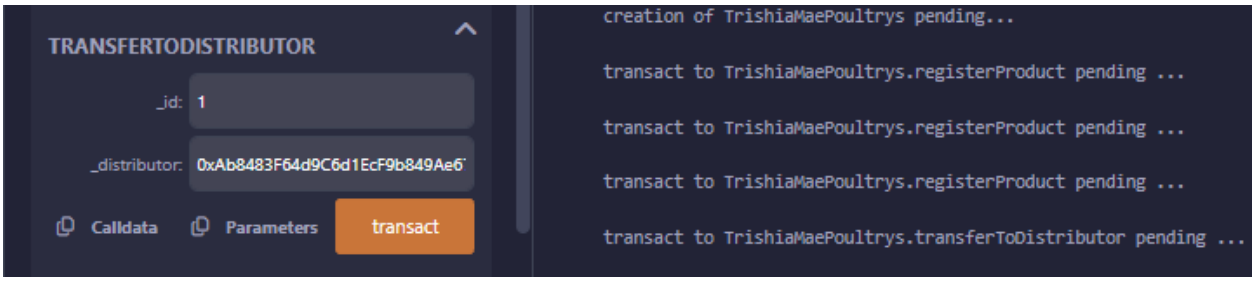






4. Transfer Function

Move ownership to the Distributor and trigger the **Automatic Status Update**.



5. Access Control

Prove that unauthorized users cannot register products or transfer ownership they don't have.

6. Data Retrieval

View the complete audit trail and batch details.
